

NAESIP Agriculture Onsite Pollution Insurance for Farmers with Nutrient Management Plans

Environmental problems on farms are often caused by animal manure, fertilizers, and pesticides. However, good nutrient management planning can help avoid these problems.

Typically most insurance pollution coverage does not apply to test and clean up the land when these known contaminants cause a pollution problem onsite. If the farmer follows a nutrient management plan, the NAESIP program covers onsite incidents.

Easy App: Complete Supplemental application specifically designed for the agriculture industry

Coverage:

- On-site clean-up coverage
- Third party pollution liability
- Contractors Pollution Liability
- Transite Pollution Liability
- Non-owned Disposal Sites
